

THE COIN CABINET

Auction 80 - End of Month Sale

LIVE BIDDING BEGINS: APR 25, 2023 12:00 PM BST

Overview of auction procedures

Registration

We recommend that you register with us as early as possible if you wish to bid in our auctions and have never previously registered. This may be done via our website (www.auctions.thecoincabinet.com > Sign Up) or by email to contact@thecoincabinet.com. Alternatively, you can also register through www.the-saleroom.com. The registration process may include references, security checks, or a bidding limit placed for first time bidders. The day of the auction is an extremely busy time, and we cannot guarantee that registrations on the day will be accepted.

Bidding

Please read our full terms and conditions at [General Conditions of Sale | The Coin Cabinet Auctions](#)

Pre-Bidding via www.auctions.thecoincabinet.com

We list our sales between 1-3 weeks before the live sale. During this period, registered bidders can place advance bids, known as pre-bids. Pre-bidding is an effective method if you wish to leave bids in advance of the live sale. You can also set a maximum pre-bid that can be higher than the current high bid. Current high bids on lots can be seen by others online, but your maximum bid cannot be seen by others, nor will your bidder identity. Your pre-bidding maximum will automatically bid against other incoming bids incrementally until the maximum is reached. You will receive an email notification should you be outbid. You may raise your maximum bid, but you cannot cancel a bid. Please email us at contact@thecoincabinet.com or call **020 3808 5855** should you wish to lower your maximum bid.

Live Bidding via www.auctions.thecoincabinet.com or www.the-saleroom.com

You can bid live from your computer or mobile device through our app (available for download on Android or iOS). We provide optional live video and/or audio feed of the auctioneer, allowing the online bidder to participate as if on the auction floor.

Bidding Priority

Please note that in the event of tied top bids, priority is given to the first bid received. We prioritise pre-bidding top bids over live bidding. It is therefore possible that a lot can sell at your live bid to a pre-bidder. To avoid confusion, the auctioneer will stress to the live bidder that they tied the pre-bidder, whose bid will take priority, and to bid again if they wish.

Saleroom Notices

Should the description of a lot need to be amended after the publication of this catalogue, the amendments will appear automatically on the website. Any pre-bidders on amended lots will be notified of the amendment. The auctioneer will announce any saleroom notices at the start of the auction and refer to any notices at the time any affected lot is offered for sale.

Images

The Coin Cabinet website features high-quality colour images of every lot in this auction. Further additional photographs may be requested by email. Please note that the images online and in this catalogue are not to scale.

Buyers' Premium (BP)

The BP for this sale is 6% of the Hammer Price (+ VAT where applicable).

Prices Realised

The hammer prices of lots sold at The Coin Cabinet auctions are posted online in real time.

Payment

You will receive your invoice the next working day after auction. Payment is to be made within 14 days by bank transfer.

The issues the mint encountered with the Jubilee coins are well documented and were exacerbated by the pressure for the coins to be ready for the Queen's Golden Jubilee on 20 June 1887. Records show that 1,771,425 half-sovereigns were struck in 1887, but only 871,770, less than 50% of the total, were fit for circulation. To improve metal flow silver was included in the alloy, which makes all 1887 London Jubilee head half-sovereigns stand out for their lighter colour. Although this variety is the most common of the 1887 Jubilee head half sovereigns, it is highly sought after due to the fascinating story surrounding the series, recently told by David Iverson and Steve Hill In their publication 'The Jubilee Head Gold Half Sovereign 1887-1893' (Sovereign Rarities, 2019).

59 **United Kingdom, Victoria, 1890 Gold Half-Sovereign, No JEB Low shield DISH L511, PCGS AU58**

UNITED KINGDOM. Victoria, 1837-1901.

Gold half-sovereign, 1890. London. No JEB Low shield DISH L511.

No half sovereigns were struck in 1888 and 1889 in an attempt to steer the public towards greater use of silver coins, which were less prone to wear than the half-sovereign and so more cost-effective. The double-florin (4 shillings) piece was produced 1887-1890 to offset for the half-sovereign shortage, but weighs 22.6 grams and measures 36 mm. The public was not happy about carrying around the equivalent value of the widely used half-sovereign (10 shillings) in silver coins. Production of half sovereigns recommenced in 1890 with 2,266,023 coins.

Having experienced lots of issues with the Jubilee coinage in the run-up to the Queen's Jubilee, the Mint continued making tweaks to the design in the following years. To improve metal flow, the reverse shield was redesigned and moved slightly lower (sometimes called wide date as the lower part of the shield pushed the date further apart). However, the Mint continued using the high shield dies from 1887 production runs until 1892, the later ones being very rare (1891 is ultra-rare). For 1890, both types are common, the new lower shield type coins slightly more prevalent than the high shield. Crowned and veiled Jubilee bust facing left; no JEB on truncation; inscription: VICTORIA DEI GRATIA BRIT: REGINA F: D: / Lower, crowned and embellished shield-of-arms; wide date in exergue; BRITANNIARUM REGINA FID: DEF:.

No half sovereigns were struck in 1888 and 1889 in an attempt to steer the public towards greater use of silver coins, which were less prone to wear than the half-sovereign and so more cost-effective. The issues the mint encountered with the Jubilee coins are well documented and were exacerbated by the pressure for the coins to be ready for the Queen's Golden Jubilee on 20 June 1887. Due to time restraints the Jubilee head sculptor Joseph Edgar Boehm's initials JEB were individually punched onto the master dies, resulting in three categories of JEB types—Imperfect J, hooked J (six unique dies) and no JEB. It is unclear in which order coins of these categories would have been produced and why at some point, presumably after 1887, it was decided to discontinue the use of dies with the JEB initials. After 1887, JEB initials are all of the Imperfect J type and become increasingly rarer as the years pass. This in our opinion indicates that coins struck after 1887 bearing the JEB initials would relate to the use of old dies from 1887 production runs, in the same way as the use of high shield dies.

To improve metal flow, the reverse was redesigned at some point after 1887 and the shield moved slightly lower (sometimes called wide date as the lower part of the shield pushed the date further apart). The production of half-sovereigns was held back for several years to steer the public towards increased use of silver coins. The Double-florin was introduced to help in this process. However, by 1892 it stood clear that the half-sovereign was irreplaceable as it was much needed in trade and very popular with the public. C. Commonwealth Gold Coinage

110 **Australia, Victoria, 1872 M Gold Sovereign, St George, NGC AU 58**

AUSTRALIA. Victoria, 1837-1901.

Gold sovereign, 1872 M. Melbourne. St George.

With the Melbourne mint just starting up in 1872, the calendar year mintage for this year was only 748,180 which includes both the Shield and St. George reverse types. Average mintage figures at this time stand in the millions, hence this is a very scarce coin in any grade.
